

Second and Third Grade Art Class

Dear Parents,

Art provides the opportunity to organize, plan, problem solve, reason, create, and explore. Art fosters the students' perception of both their real and imagined worlds. They will learn to grow in self expression, creativity, discovery, and realization of ideas. The world is filled with art, and no one can avoid dealing with art in some form or other.

In these grades, a review of the color wheel starts the art year. Drawings are made in markers or crayons using only primary and secondary colors. The use of construction paper projects, stained glass tissue projects, and copper punch art quickly fill the year.

Picasso abstracts are made and Mondrian lines are colored brightly on large paper when we study the classic masters.

Art is partnered with other classroom courses. For example, solar systems are painted when that topic is studied in Science, and posterboard life sized animals are made when students study regions of the world in Social Studies.

Seasonal projects also add fun throughout the year!

If you have any questions, please contact me at school.

Sincerely,

Mrs. Osborne
